# Domain Names

Your guide to our domain registration services

## Why let us manage your domain?

- Fully managed service
- Range of web forwarding options
- Practical, user-friendly technical support

## How domain registration works

We start by checking your preferred domain name is available. If it isn't, we will suggest alternatives. We will then register your domains.

It can take up to 72 hours for a domain name to become visible on the internet as it globally updates. This applies for all domain names regardless of extension or registrar. However, in the majority of cases your domain name will be live within a few hours.

Once you've registered a domain name, you'll also need to purchase web hosting to build your website and use email services.

With us you own your domain name and therefore have full rights and control over it; we never register customer domains in our name.

## Protect your details with domain privacy

Anyone buying a domain name, from any provider, is required to provide correct contact details which are then added to the public, globally accessible WHOIS database. This information is often used by third parties for spam, scams, and selling on. You can prevent your contact details being listed in this way with our Domain Privacy service. If you're buying any .UK domain name (ending .uk, .co.uk, .org.uk, or .me.uk) and you're a non-trading individual, you can hide your contact details from public view.

Registering a domain name with another extension? We provide a domain privacy service which will show secured contact details instead of yours for a small cost. Ask for details.

## Future changes...

Our fully managed service means you don't have to worry. We will update your domain settings and manage future renewals on your behalf.

**To order a domain call 01686 624 258 or email [hello@creativelead.uk](mailto:hello@creativelead.uk)**
